Summary

Hi there! I'm a 21-year-old tech enthusiast with a deep passion
for the digital world . As a front-end developer, I specialize in
crafting stunning and engaging user interfaces # using cutting-edge
technologies like Vue.js and React.js.

My journey in tech started early, and ever since, I've been committed
to leveling up my skills and staying ahead of the curve . I thrive
on exploring the latest trends and innovations to deliver creative,
efficient, and impactful solutions that truly make a difference for
users.

I'm eager to embrace new international opportunities, particularly in
Australia, where I can contribute my expertise and grow in a dynamic
and innovative environment.

If you're looking for a passionate, curious, and forward-thinking
professional, let's connect!

_____

Experience

DoneDeal
Full-stack Developer
February 2025 - June 2025 (5 months)
Sydney, New South Wales, Australia

At DoneDeal, I worked as a Full Stack Developer on the creation of an all-in-
one platform aimed at connecting football teams and players. The platform
allows clubs to hire players, coaches, agents, and other professionals, while
also enabling players to contract agents and representatives.

All payments are processed directly through the platform, which retains a
commission on each transaction — ensuring security, transparency, and ease
of use for both sides. I was responsible for developing and maintaining core

features on both the frontend and backend, contributing to a scalable and user-friendly product from the ground up.

TM
Full-stack Developer
January 2024 - January 2025 (1 year 1 month)
Sydney, New South Wales, Australia

I worked as a Full Stack Developer on the TM learning platform (formerly known as Laravue), where Tiago Matos teaches Laravel and Vue.js. I was responsible for developing several key features across both the student-facing platform and the internal admin dashboard. My role involved end-to-end development, from backend logic to frontend interfaces, helping to improve the user experience and overall performance of the platform.

Freelance
Development of a Student Email Capture Page | Focused on Conversion and API Integration
December 2022 - December 2022 (1 month)

I've worked on a variety of web development projects, creating functional and visually appealing solutions. Some of my key contributions include:

- Developing a dynamic and responsive course page;
- Implementing an email registration system integrated with an API;
- Building a custom Figma plugin to optimize design workflows;
- Providing strategic assistance in private projects, ensuring quality and efficiency.

These experiences have enhanced my ability to deliver results that align with both user needs and business goals.
